

*Wouldn't it be nice to never explain a network outage to your clients or associates ever again?*

## Isn't it time a data center were in your plans? It should be...and SCG Services wants to be your choice.

### What does the future hold?

What is your company's vision for an IT infrastructure? Would you like it to support high-performance business with limitless capacity for bandwidth? Has a disaster recovery plan been looming with no real solution? Do you need more power to accommodate new gear? Is enhanced security or reliability a benefit?

### Helping you get ahead

The data center experts at SCG Services can help transform your current IT solution into your vision for the future. We can show you how to transition into an IT infrastructure that better supports your strategic goals, or we can simply operate in the background as your network back-up solution.

### Unexpected advantages

In a data center, you expect non-stop services like power, connectivity, security, and a controlled environment. What sets us apart is an obsession with going the extra mile:

- **Non-stop IP:** Imagine always being connected to the best path on the Internet and achieving speeds and quality never before realized
- **Unlimited bandwidth:** Tell us what you need !
- **Shop and save money:** We have access to all the national IP and telecom carriers and can quickly connect to your choice
- **Up to 8 levels of security are available, and 4 are standard:** Never be concerned about data loss due to theft or vandalism
- **Office and meeting space always available:** Utilize an office while you're working on your equipment, or use the conference room for an on-site meeting
- **Unlimited room for expansion:** Space, power, and air conditioning requirements will never be a limitation
